CAREER OBJECTIVE

Detail-oriented BSc Computer Science student with hands-on experience building full-stack web applications and Java systems. Demonstrated ability to architect end-to-end solutions — from PostgreSQL schemas and REST APIs to React dashboards with real-time analytics. Passionate about clean, scalable code and eager to contribute to a fast-moving engineering team through an internship.

TECHNICAL SKILLS

Languages	Java, JavaScript (ES6+), Python, C, SQL
Frontend	React.js, HTML5, CSS3, Recharts, Vite, Responsive Design
Backend	Node.js, Express.js, REST APIs, JWT (access + refresh tokens), bcrypt
Database / ORM	PostgreSQL, MySQL, Prisma ORM, JDBC, File I/O
Security	JWT Auth, Refresh Token Rotation, Helmet.js, Rate Limiting, CORS, bcrypt
Microsoft Suite	MS Word, MS Excel (formulas, pivot tables), MS PowerPoint, MS Access, MS Outlook, OneDrive, SharePoint
Tools	Git, GitHub, VS Code, IntelliJ IDEA, Postman, Linux
CS Fundamentals	OOP, Data Structures, Algorithms, DBMS, OS Concepts
Currently Learning	Spring Boot, System Design, DSA, Advanced React Patterns

PROJECTS

NexVault — Smart Finance & Wealth Management Platform *React.js · Node.js · Express · PostgreSQL · Prisma ORM · JWT · Recharts · Vite*

- Built full-stack FinTech app for personal finance management — income, expenses, budgets, accounts and savings goals
- Implemented JWT authentication with access token + refresh token rotation for secure, seamless sessions
- Designed PostgreSQL database with Prisma ORM across 8 models; built REST API with 7 route modules and role-based auth middleware
- Created interactive dashboard with real-time charts using Recharts; implemented dark/light theme toggle via CSS variables
- Built slide-in notification system with unread badge; added graceful mock-data fallback when backend is unavailable
- Secured with bcrypt password hashing, Helmet.js, rate limiting, and CORS configuration

Library Management System *Java · OOP · File Handling*

- Built role-based access system for admin and student users with secure login and session management
- Implemented book issue & return workflow with automatic fine calculation and full transaction history
- Designed search system and persistent data storage using Java file handling

Student Management System *Java · MySQL · JDBC · OOP*

- Full CRUD system with auto-generated Student IDs and persistent storage via MySQL + JDBC
- Grade tracking, attendance management, and data export functionality built with Java Collections

Java Bank Management System *Java · OOP · File I/O*

- Account creation, deposit, withdrawal, balance inquiry with PIN authentication
- File-based persistence and clean OOP design demonstrating core Java concepts

Scientific Calculator *HTML · CSS · JavaScript · DOM*

- Web-based calculator with arithmetic, trigonometry, and logarithm operations
- Full keyboard input support and responsive UI — live demo deployed on GitHub Pages

Weather Dashboard *JavaScript · REST API · Fetch API · CSS Grid*

- Real-time weather app using OpenWeatherMap API with 5-day forecast and geolocation auto-detection
- Displays humidity, wind speed, and current conditions in a clean CSS Grid layout

EDUCATION

Bachelor of Science in Computer Science

2023 – 2026

Savitribai Phule Pune University (SPPU) — PRES's Padmashri Vikhe Patil College, Pravaranagar

Higher Secondary (Class XII) — 72%

2023

Shree Ganesh Vidya Mandir
